

Valuation Discrepancy Report

Property: 20588 Upper Hillview Dr, Sonora, CA 95370

This report documents the discrepancy between two major real estate platforms (Zillow and Realtor.com) regarding the estimated market value and property details of the above property. The difference in valuations highlights the inconsistency of corporate databases and confirms that Osborne Homes based their \$265,000 offer on the lower Zillow estimate, which is outdated and incomplete.

Source	Estimated Value	Lot Size	Photos/Records Date
Zillow	\$268,379	1.5 acres	2013 (outdated photos)
Realtor.com	\$531,000	2.5 acres	Current/Updated

Conclusion: The disparity between Zillow and Realtor.com demonstrates that the true value of the property is significantly higher than the figure Osborne Homes attempted to use as a basis for their cash offer. This discrepancy is entered into the Validation Packet as supporting evidence.
